

## Lab Fit Out Incentive Opportunities

**Are you a Lab Tenant interested in Energy Efficiency?**

**Are you considering implementing any of the following high efficiency systems in your biotech/ life sciences space?**

1. High Performance Fume Hoods
2. High Efficiency Biosafety Cabinets
3. Lab Plug Load Controls
4. Cleanroom Turndown

**We can help find and implement solutions to save you money and energy.**

Our team has developed a seamless method for calculating energy savings for the four common lab systems listed above. We can estimate your energy savings as well as provide a one-time incentive for implementing these systems in your lab space.

If your team is considering additional energy efficiency solutions, we can incorporate these initial calculations into a custom analysis designed to help you reach your carbon neutrality and sustainability goals.

**Contact our life sciences/biotech Energy Efficiency Consultants to get started:**

**New Construction/  
Gut Renovations**
